For several years past I have been intimately acquainted with the bearer Edward Robinson. He appears to labour under a predisposition to disease of the lungs and has several times been dangerously ill apparently from slight causes. I have no doubt but his health might be injured were he compelled to do Military duty. Therefore advise that he be excused

Josiah Noyes
Prof. Chemistry

Hamilton College
May 1817

From my personal acquaintance with Edward Robinson I fully concur in the above opinion

Seth Hastings Jun Surgeon 20th Regt
N.Y. Militia

Clinton 5th June 1817.

Having attended Mr. Robinson through a violent & dangerous Pneumonia the last summer I concur with the above Gentlemen in that he should be exempt from Military duty

Sewall Hopkins Physician

Clinton 5th June 1817.

b5b

This Certifies, that a few years since, I attended Mr. Robinson, thro' a severe fit of illness — that I have since been acquainted with, & seen him frequently — & believe, considering his delicate state of health that he could not do military duty with safety —
